

You need to update your FCC rules to protect all Americans. In this day of terrorism some of the worst crimes are being committed through the air by corrupt radio engineers.

This is not discussed or that well known other than a demonstration by the FBI against Waco Texas. Sick acts such as Waco are still happening every second of every day against innocent people. I'd like to see you establish a 5 year minimum federal prison sentence for the terroristic use of radio waves against the American public.
